Why Persolog Personality Profiles?

Persolog is the exclusive publisher of the materials of Dr. John Geier, who was the founder of the first DISC profiles in the 1960's based on Martson's work. He was a research professor and developed the profiles and their application until recently. Persolog is now based in Germany and has a high commitment to quality. The price quality ratio is excellent since the questionnaire items together have a very high reliability score (.87-.91 for the different scales). The profiles are also validated with the well-known Big Five personality test. The certification enables the participant to work with these profiles in group settings as well as individual coaching sessions.

What do you gain?

The ability to work in teams, we share easy to use concepts. The ability to coach individuals. The instrument is designed as a learning tool despite most instruments that are used as a diagnostic tool – persolog profiles takes you much beyond analysis and provide the trainers/coaches with possibilities to adapt behaviour and increase personal effectiveness.

The Authorisation Program
